Digital Inspections

Verify: AI-Powered Proofreading Software

Automate digital file inspections with the industry’s fastest cloud-based proofreading software.

"GlobalVision provides accuracy and minimizes the number of people reviewing documents. This saves time and allows us to commit to shorter turn-around timeframes."

Jan Meyers
Global Labeling Senior Specialist, Regulatory Affairs

Bristol-Myers Squibb

 **+ AI-Powered**

Optical Character Recognition
Convert flattened text into live, readable text.

 **+ AI-Powered**

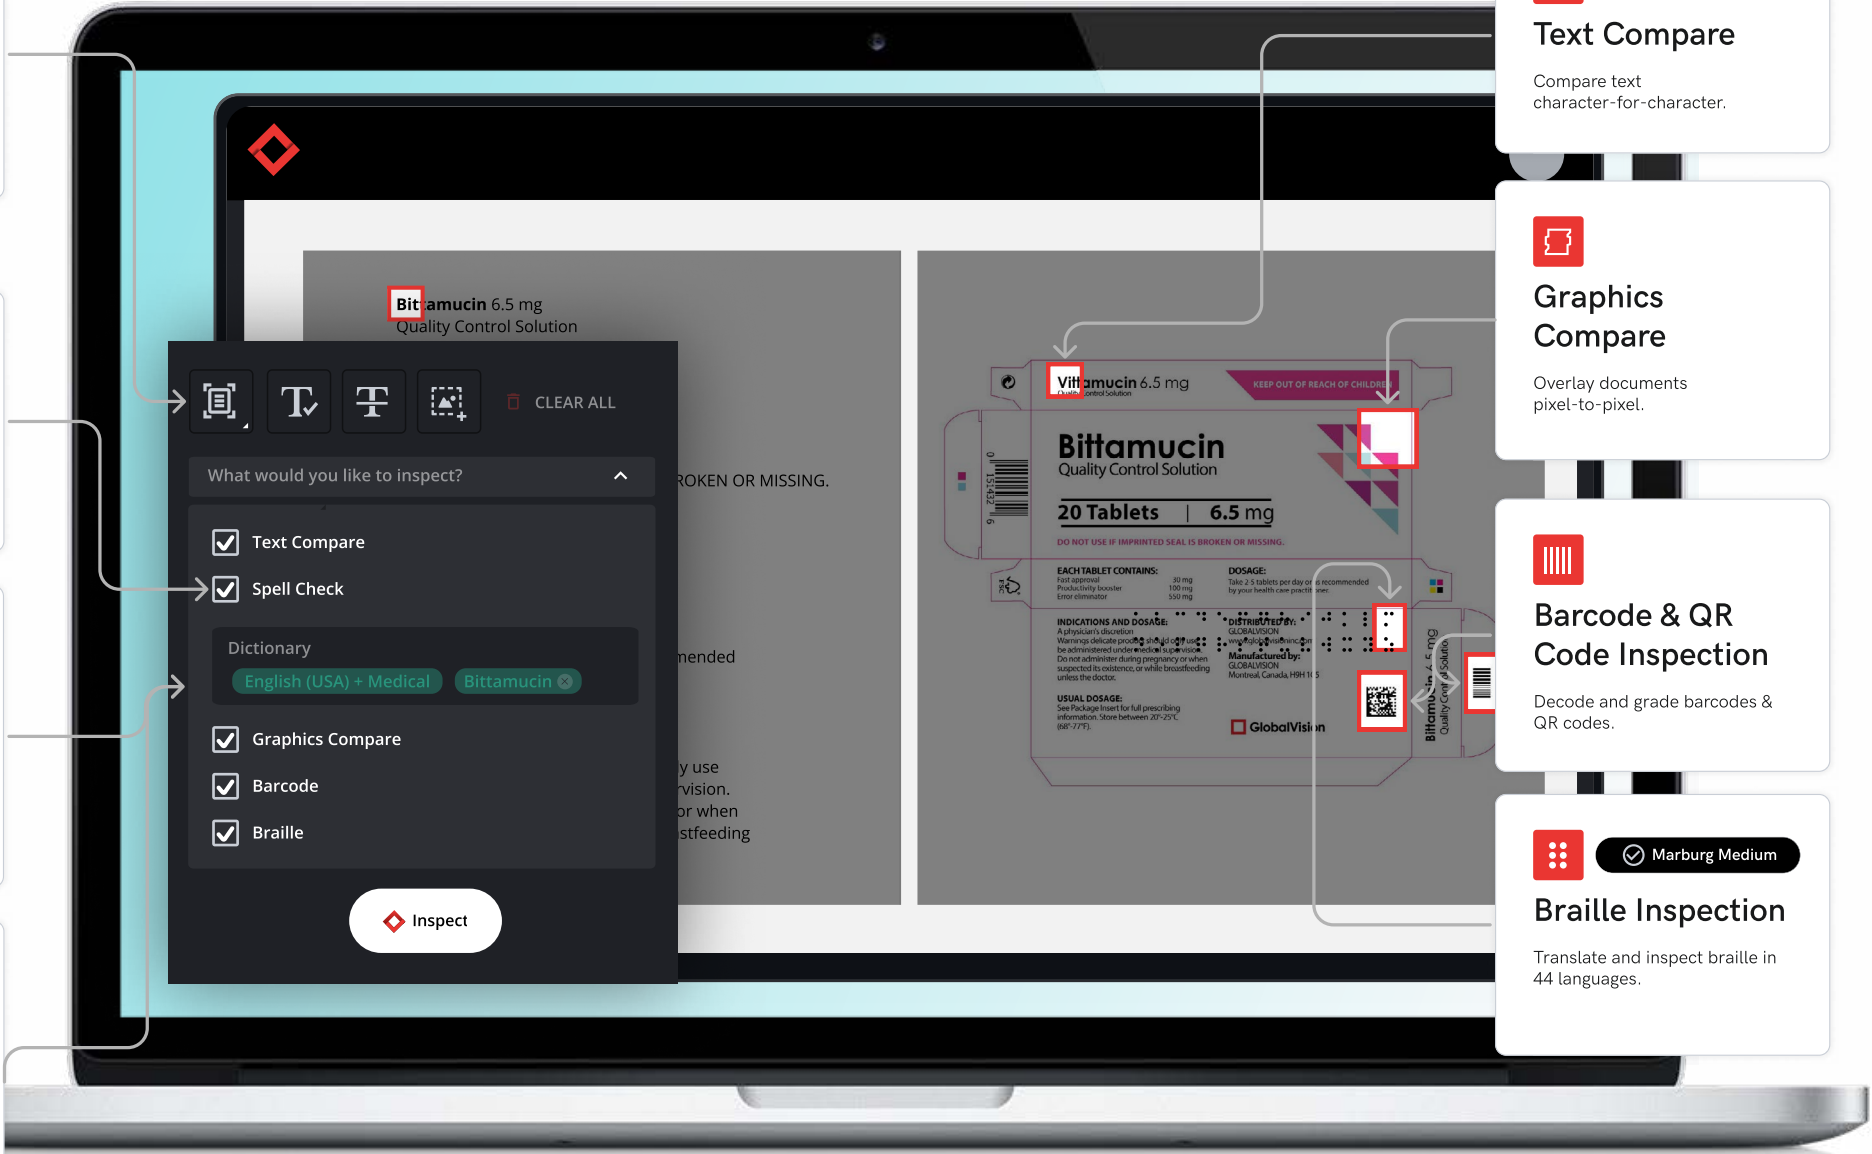

Spell Check
Check spelling in 44 languages + Smart word classification and discarding.

Medical Dictionaries
Inspect medical terms with continuously updated medical dictionaries.

Custom Dictionaries
Build custom dictionaries with your brand's specific terms.

Text Compare
Compare text character-for-character.

Graphics Compare
Overlay documents pixel-to-pixel.

Barcode & QR Code Inspection
Decode and grade barcodes & QR codes.

 **Marburg Medium**

Braille Inspection
Translate and inspect braille in 44 languages.

Verify is The Leading Proofreading Software for Regulated Industries

- Regulatory Compliance
- Labeling Quality Control
- Promotional Materials Quality Control
- Prepress Quality Control

You Can Inspect

 Presentations

 Brochures

 Labels

VerifyAPI:
Inspection APIs Directly in Your Workflow

VerifyAPI’s powerful APIs integrate with virtually any platform, embedding error detection directly into your artwork management system.

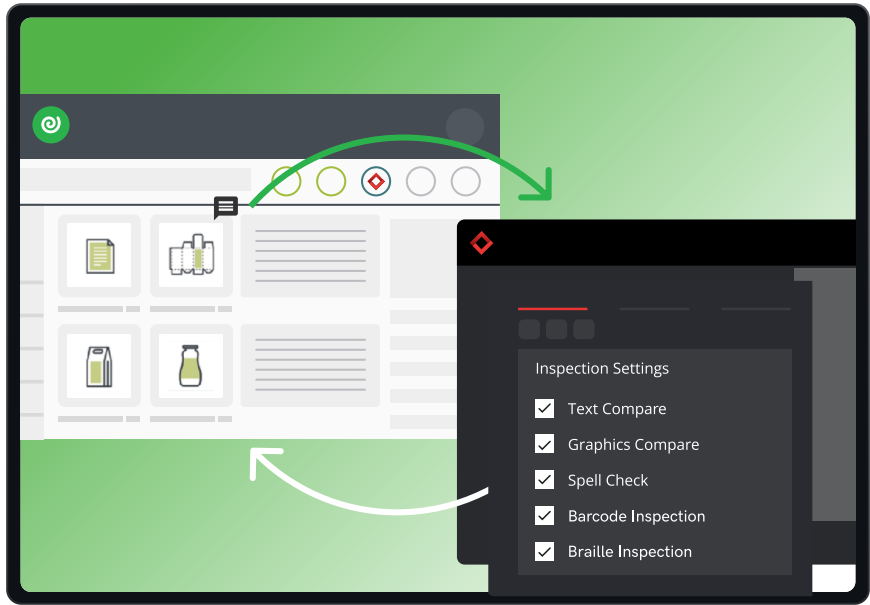

- Barcode/QR Code Inspection
- Graphics Compare
- Spell Check
- Text Compare
- Braille Inspection
- Optical Character Recognition

Integrations

Our Technology Partners

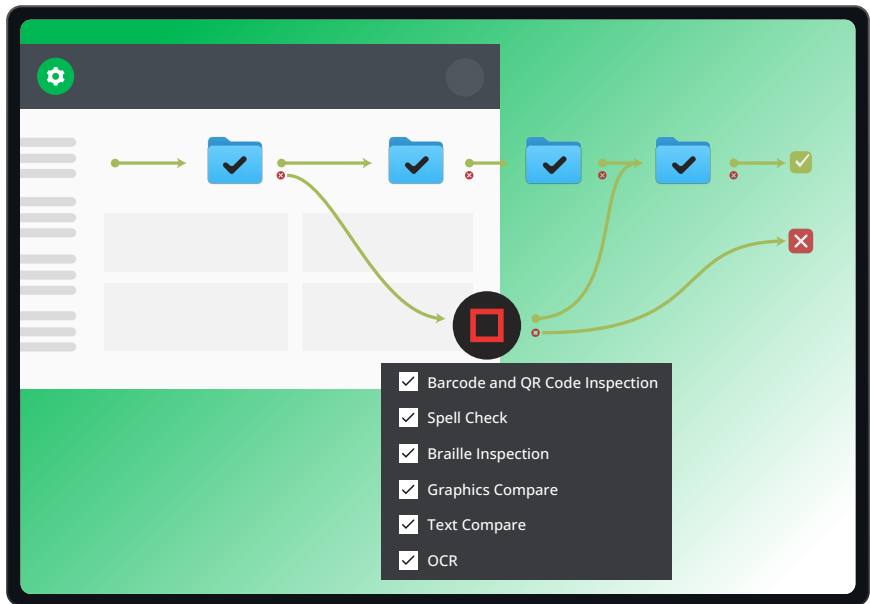

Esko WebCenter

Verify's AI-Powered proofreading tools—just one click away from Esko's WebCenter.

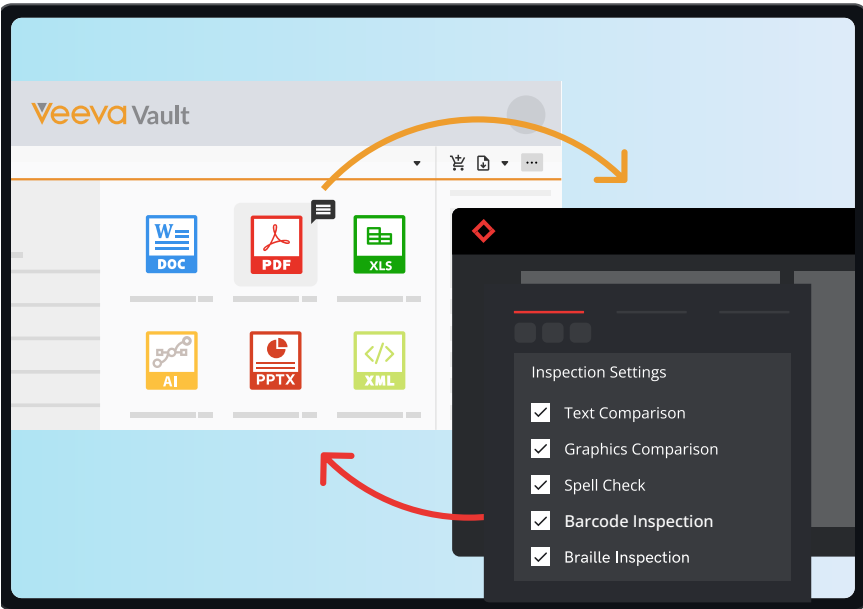

Esko Automation Engine

Automated quality inspections directly from your Esko Automation Engine workflow.

Veeva Vault

Verify integrates with virtually any Veeva Vault including Vault RIM, Vault Promomats, and Vault QMS.

Hybrid CLOUDFLOW

Verify Automation's Inspection APIs embedded directly within CLOUDFLOW.

**Automate
Print Inspections**

GVD: Quality Inspection Software for Print

Inspect printed assets with GVD—combining our full suite of quality inspection modules with a robust scanner, GVD allows you to inspect text, graphics, barcode, braille, and color within seconds.

Graphics Compare

Inspect printed proofs against master files with pixel-to-pixel accuracy.

Barcode Inspection

Verify and grade barcodes and QR codes without a handheld scanner

Braille Inspection

Inspect, and translate braille dots across multiple braille regions.

Add-on: Braille Height for Marburg Medium & ISO 17351:2013 compliance

Color Inspection

Measure color space values with built-in Pantone® books without a spectrophotometer.

GVD is the Leading Quality Control Software for Regulated Industries

-  Incoming Quality Assurance
-  Prepress Quality Control
-  Production Quality Control

You Can Inspect

Cartons

Inserts

Flexo

Labels

Press Sheets

Brochures

Graphics Compare

Detects all differences between master files and printed proofs with a pixel-to-pixel overlay, ensuring no errors go undetected.

"GlobalVision provides an integrated system that is technologically advanced and sophisticated allowing for fast analysis. The system is extremely user-friendly and the support and training made the transition seamless."

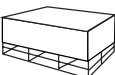

Veronica Guilliams
Senior Manager, Visual Inspection
Pfizer

GVD Scanner Guide

Choose the right GlobalVision scanner for your inspections.

Scan Model	Type	Scanning Area	Scanning Speed
 F0	Flatbed	A0: 33" x 47" (841 mm x 1189mm)	60 sec
 F2	Flatbed	A2: 18" x 24" (457 mm x 610 mm)	5 sec
 F3	Flatbed	A3: 11.7" x 17" 297 mm x 432mm	12 sec
 F4	Flatbed	A4: 8.5" X 11.7" (216 mm X 297 mm)	10 sec
 R44	Roll	44" Roll - 1117 mm	1.9 inch / sec
 R42	Roll	42' - 1067mm	8.9 ips
 C8	Cylindrical	0.79" - 6.30" diameter	8 pages per min
 B3	Booklet	A4: 8.5" X 11.7" (216 mm X 297 mm)	Duplex: 120 ipm

What Customers Are Saying About Us

"The reliability associated with both the implementation, the maintenance, and the operation of the [GlobalVision] system has been amazing."

"The [GlobalVision] system is effective at finding almost every error possible. It's one-hundred percent effective."

"Clients are always looking to be more efficient with their budget. With GlobalVision, we're able to do more work within the same time, meaning they're getting more for their dollar."

"We've caught numerous mistakes, which has saved the company thousands of dollars over the years that we've been using GlobalVision."

"[GlobalVision] is extremely accurate and powerful; we easily and thoroughly compare new and old carton artwork using the web-based software. [...] It really makes finding the differences clear and easy."

"GlobalVision has been vital in artwork development as it helps pick up the tiniest of errors and differences both within text and graphics."

"GlobalVision has reduced frustration, and there is less risk of customers rejecting packaging because of a print error."

"GlobalVision can help us find even the most delicate differences in color and text"
